

MARKET REPORT – WEEK 23

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 7TH JUNE 2019.

The only dry cargo gainer last week, that affects the BDI, was the BCI which closed up by +15% w-o-w and so in turn improved the overall BDI by +3.8% too. The non-contributing BHSI also gained 3.5%. Over the same period the BPI lost -9.1% as too did the BSI by -4.4%.

It seems that while Singapore and China both took one day bank holidays during last week and many others around the world spent time watching President Trump's State Visit and / or the Cricket World Cup (also taking place in the UK), not a lot of S+P business was concluded. The dry S+P sector remains especially quiet with owners hoping for some positive international economic news or developments that they can use to underpin or improve their vessels values but unfortunately see nothing on the horizon which means that buyers currently retain most of the bargaining chips.

Tanker S+P fortunately has a bit more wind in its sails these days (than dry), with moderate levels of concluded deals ranging single vessel sales, through bloc fleet deals to Judicial sales.

Sub-continent recycling activity has now basically shifted almost totally away from Bangladesh because its breakers yards are full and specifically last week was Eid which is basically a post Ramadan holiday period. Pakistan remains similarly inactive but not only last week where they also celebrated Eid, but for almost 8 months now because domestic breakers and steel mills there simply cannot make the economics of their trade work at this time. That said, India technically is left as the only market that is currently open for business including last week, although even they are not exactly prolific buyers at the moment since their local steel prices also remain under pressure as they head into the Monsoon season. Meanwhile India remains the go to location for 'green recycling' where nearly 80 yards there are now compliant with the Hong Kong convention.
