

## **MARKET REPORT – WEEK 41**

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 9<sup>TH</sup> OCTOBER 2020.

The world's main 2 talking points remain the same, ie (1) now that the northern hemisphere is post the main holiday season it appears Covid-19 infection rates are increasing again which serves to demonstrate the conundrum all governments face whereby they can currently only push their economies back into commerce and production at the expense of lives, and vice versa. A vaccine cannot come soon enough. And (2) the approaching US Presidential election keeps people watching the news (mainly through the gaps in their fingers while covering their eyes) purely in order to know whether President Trump is still Covid-19 infectious or not nor what he will say, do or claim next.....

The BDI took a small hit last week, predictably due to the capes maxing out in the low \$30,000 per day as the Chinese seemingly completed their restocking of ore and coal. The BCI accordingly fell back by nearly -11% in the last 2 days of the week. The BPI meanwhile closed up +4.8%, the BSI down by -1%. The BHSI closed up by a smidgen of +0.35%. Overall the BDO closed -6.34% down for the week.

The wet freight markets have gone further from bad to worse last week, especially for crude carriers whereby while VICCs are currently averaging a lowly \$3,380 daily, Suezmaxes and Aframaxs are only seeing averages of about \$470 and \$138 daily respectively.

The sub-continent recycling markets appear to be remaining steady, with rates on offer still ranging \$330-360 depending on the vessel type and local competition between buyers and despite the apparent operation of a cartel between the larger buyers in Bangladesh we cannot be sure exactly what effect it is having.
